We've been seeing burlap everywhere—in fashion and in home furnishings. It's a cool, trendy look. But in quilts? Yes! Especially when it's our new Burlap cotton prints with the look and rich texture of burlap, but none of the scratchiness. Fine printing has made these burlap-look prints possible—you can just see the burlap weave. We've chosen a rich palette for this collection, which includes metallics, brights, and earth tones. These alternatives to plain solids are sure to become classics.
